Middleware file for auth and next-international

```
import { createI18nMiddleware } from 'next-international/middleware'
import { NextRequest } from 'next/server'

const I18nMiddleware = createI18nMiddleware({
        locales: ['en', 'ar'],
        defaultLocale: 'en',
})
export { auth as Middleware } from './auth'

export function middleware(request: NextRequest) {
        return I18nMiddleware(request)
}

export const config = {
        matcher: ['/((?!api|static|.*\\..*|_next|favicon.ico|robots.txt).*)'],
}
```
